

Terrazzi
Sprayable Microcement

 **düraamen**
engineered to perform

Innovative, Modernistic Flooring.

The innovation of polished concrete.

Architects and designers often turn to polished concrete to achieve a modernistic appearance in a home, office, or business. Polished concrete is in use in some of the most trendy and aesthetically pleasing building projects around the globe.

To help with the high demand for concrete finishes, Duraamen has developed Terrazzi, a sprayable microcement system, a truly innovative technology. Terrazzi virtually eliminates poor results and reduces the cost and installation time of polished concrete floor projects.

Spraying a polished concrete microcement results in an ultra-smooth, super-fine surface that is free of trowel marks.

Terrazzi is ideal for architectural concrete projects in residences and businesses when cost, durability, and a modern appearance are sought-after.

Versatility

To achieve a polished concrete finish Terrazzi can be used on its own or as a resurfacing layer over self-leveling concrete. It may also be sprayed over gypsum and then subsequently stained or dyed.

Renew worn-out, dull-looking stamped concrete driveways and patios. Resurfacing outdoor areas with Terrazzi is a fast way of achieving the consistent look of new concrete.

Quickly create the look of smooth modern concrete on any vertical surface, even ceilings. If desired, troweling creates subtle color movement and a fresco finish.

Features

Terrazzi is a modern concrete design solution for interior & exterior use. Unlimited color combinations and textures can be realized using integral color pigments, chemical stains, dyes, and water-based stains. Terrazzi is available exclusively from Duraamen.

Freeze / thaw stability

Superior abrasion resistance

Very low VOCs

Superior bond strength to the substrate

Terrazzi Floor System

Innovation

The Terrazzi System installs by spraying a specifically designed concrete resurfacing compound with a specially designed sprayer. The wet surface is broadcast with a proprietary blend of recycled glass and crushed marble aggregates that provide a polishable surface and increase the floor's strength.
